Özge Sürer

Northwestern University
Department of Industrial Engineering and Management Sciences
2145 Sheridan Rd, Evanston, IL 60208

(312) 909-6737
ozgesurer2019@u.northwestern.edu
https://ozgesurer.github.io

Research Interests

Methodology: Statistical and Machine Learning, Computational Statistics, Predictive Models, Data Analytics
Applications: Recommender Systems, Public Health, Physical-Statistical Modeling

Education

Northwestern University — Evanston, IL
Ph.D. in Industrial Engineering and Management Sciences — *December 2020*
Advisors: Professors Daniel W. Apley, Edward C. Malthouse
Thesis: Predictive Models for Group-Structured Regression and Classification Problems
Major in *Applied Statistics & Statistical Learning*; Minors in *Analytics* and *Optimization*

Boğaziçi University — İstanbul, Turkey
M.S. in Industrial Engineering — *January 2014*
Advisor: Professor İ. Kuban Altinel
Thesis: Event and Clock-Based Representations of Time in Mathematical Optimization

İstanbul Technical University — İstanbul, Turkey
B.S. in Industrial Engineering — *June 2011*

Academic & Professional Experience

Northwestern Argonne Institute of Science and Engineering — Evanston, IL
Postdoctoral Research Fellow — *January 2021 – Present*
Supervisors: Matthew Plumlee, Stefan Wild
Topics: Bayesian statistical methodology and its applications in machine learning including Gaussian processes, tree models, and dimension reduction, computational statistical inference including multi-model emulators, uncertainty quantification for parameters, model calibrators, and model mixing

United Airlines — Chicago, IL
Statistics and Operations Research Intern — *June 2019 – September 2019*
Topics: Spill & recapture model for predicting the future demand, benchmark studies through data analysis techniques and visualization, decomposition methods to more accurately and efficiently model spill and recapture

Northwestern University — Evanston, IL
Research Fellow, Spiegel Digital & Database Research Center — *September 2016 – September 2020*
Topics: Recommender systems in multisided platforms, data analytics

Teaching Experience

Northwestern University — Evanston, IL
Instructor, Industrial Engineering and Management Sciences Department — *Spring 2019*

- IEMS 303 Statistics (Undergraduate level)
  Class size: 29, Instructor overall effectiveness: 5.35/6.00
  Topics: Foundations of statistics and statistical computing for data analysis, descriptive statistics and statistical inference
  Teaching project: Implemented a project titled "Confidence in Learning Statistics with R Programming Language" as a participant of the Searle Center Teaching-As-Research program

Teaching Assistant, Industrial Engineering and Management Sciences Department

- IEMS 202 Probability (Undergraduate level) — Winter 2017, Spring 2018
- IEMS 303 Statistics (Undergraduate level) — Fall 2016/2018, Winter 2019, Spring 2020

Teaching Assistant, Master of Science in Analytics

- MSIA 421 Data Mining — Winter 2018

Bootcamp Instructor, Industrial Engineering and Management Sciences Department

- Statistics (Ph.D. level) — Fall 2016

Presentations & Invited Talks

[1] (*upcoming*) SIAM Conference on Uncertainty Quantification, Atlanta, GA (April, 2022). *A sequential approach to calibration of a computationally intensive model.*

[2] (*upcoming*) SIAM Conference on Parallel Processing for Scientific Computing, Seattle, WA (February, 2022). *Calibration of a computationally intensive model with parallel computing aspects.*

[3] (*upcoming*) Winter Simulation Conference, Phoenix, AZ (December, 2021). *Calibration using emulation of filtered simulation results.*

[4] INFORMS Annual Meeting, Anaheim, CA (October, 2021). *Calibration using emulation of filtered simulation results.*

[5] INFORMS Workshop on Data Mining and Decision Analytics, Anaheim, CA (October, 2021). *Discovering group structure in longitudinal data.*

[6] INFORMS Annual Meeting, Seattle, WA (October, 2019). *Coefficient tree regression for discovering structure in generalized linear models.*

[7] INFORMS Annual Meeting, Seattle, WA (October, 2019). *Discovering structure in longitudinal data via coefficient tree regression.*

[8] INFORMS Annual Meeting, Phoenix, AZ (November, 2018). *Coefficient tree regression for discovering hidden structure.*

[9] The 12th ACM Conference on Recommender Systems, Vancouver, Canada (October, 2018). *Multistakeholder recommendation with provider constraints.*

[10] The Midwest Machine Learning Symposium, Chicago, IL (June, 2018). *Coefficient tree regression for discovering hidden structure.*

[11] The 11th ACM Conference on Recommender Systems, Como, Italy (August, 2017). *Improving similarity measures using ontological data.*

[12] The 34th National Conference for Operations Research and Industrial Engineering, Bursa, Turkey (June, 2014). *Event and clock-based representations in mathematical optimization.*

[13] The 26th European Conference on Operational Research, Rome, Italy (July, 2013). *Simulated annealing algorithm with variable cluster number and comparison with k-means algorithm.*

[14] The 25th European Conference on Operational Research, Vilnius, Lithuania (July, 2012). *A multi-criteria based evaluation of innovation strategy selection.*

Mentoring Experience

Doctoral student

Bayesian Analysis of Nuclear Dynamics Collaboration, Summer Fellow

- Yuriy Volkotrub — June–September 2021

  Building a statistical method for quantifying the uncertainty in a physics model

Undergraduate students

Northwestern University, Industrial Engineering and Management Sciences Department

- Justin Chen — June–September 2021

  Integration of visualization and diagnostics modules to the Python package `surmise`

- Huangda Shang (co-supervised with D. Morton) — September 2020–March 2021

  Alternative solutions of COVID-19 staged alert systems via derivative-free optimization methods

- Aneesh Kudaravalli, Katherine Johns, Margot Dupeyroux, Robert Wong, Yun Hwan Choi (co-supervised with D. Morton) — September–December 2020

  Investigation of different trigger metrics for COVID-19 staged alert systems

- Achyut Kasi, Cindy Sanchez (co-supervised with D. Morton) — June–September 2020

  Development of a module to produce graphs and reports automatically for the COVID-19 staged alert system

Awards & Honors

- Walter P. Murphy Fellowship for outstanding first year Ph.D. students at Northwestern, Evanston, IL 2015–2016
- Scientific and Technological Research Council of Turkey Scholarship, Turkey 2011–2015
- Council of Higher Education Undergraduate Scholarship, Turkey 2006–2011

Service & Professional Activities

- **Organizer**, SIAM Conference on Parallel Processing for Scientific Computing,
  Workshop, Seattle, WA February, 2022
  (upcoming) *Statistical Methods for Uncertainty Quantification and Parallel Computing*
- **Session chair**, INFORMS Annual Meeting, Anaheim, CA October, 2021
  Data-driven Modeling in Uncertainty Quantification
- **Session chair**, INFORMS Annual Meeting, Seattle, WA October, 2019
  Interpretable Predictive Models
- **Session chair**, INFORMS Annual Meeting, Phoenix, AZ November, 2018
  Intriguing Tweaks in Data Science I
- **Participant**, INFORMS Doctoral Student Colloquium, Houston, TX October, 2017
- **Participant**, ACM Summer School on Recommender Systems, Como, Italy August, 2017
- **Organizer**, Global Conference on Engineering and Technology Management, İstanbul, Turkey June, 2014
- **Session chair**, Global Conference on Healthcare Systems Engineering, İstanbul, Turkey August, 2014
  Health Economics
- **Session chair**, European Conference on Operational Research, Rome, Italy July, 2013
  Artificial Intelligence–Fuzzy Systems

Open-Source Software

- `surmise`, v0.1.1 released July 2021 read the docs, project page
  Python package designed to provide a surrogate model interface for calibration, uncertainty quantification, and sensitivity analysis.
- `CTR`, released September 2020 vignette, project page
  R package for the application of coefficient tree regression (CTR).
- `COVID-19 Staged Alert System`, released May 2020 project page
  Python code for finding the best COVID-19 staged strategy.
